

Important Update for RxDME2000 users!

RxDME2000 version 2.12 released!

The following is a list of enhancements and fixes for version 2.12. We recommend you download and install this version ASAP.

1. FTP upload will function with or without SafeTP20 installed see next column on why and how to install SafeTP20.
2. CMN Check boxes in the claim will not disappear
3. Rental Return screen has been brought back. Now using Edit in Place to change Rental Out status.
4. AutoFill Change and Doctors Notes screen no longer shuts software down.
5. Incorrect Insurance plan warning has been tamed.
6. All major screens have been resized to fix on computers with the extremely large 800x600 resolution, however our software works best in higher resolutions.
7. The "Prepare" program has been modified to fix the diagnosis codes for Medicaid's and commercial payers. Additionally the program has been given the ability to use MA Medicaid PCC#'s.
8. While scrolling down a patients transactions screen if the claim has a narrative you will receive a blue warning line.
9.  Globe Icon on the Main menu brings you to our Web Based support page, here you can browse several knowledge bases, create a new support case or review the history on your support cases. You can create your own account.
10. All links on the Internet menu have been updated and are working.
11. Allowable Update fixed to update all items

(cont from previous column)

with same procedure code / modifier.

12. ****Enhancement**** if an items procedure code has changed and if you change procedure codes in the item file the system will ask if you want to change every transaction as well. Warning, this can take some time.
13. New Reconcile Write file created to better track write offs, adjustments and closed claims. There are search / reporting screens in the reconcile module
14. Prior Authorization expiration / renewal date created.
15. If a product has a product alert screen, which is created in the item file a 'Caution' button appears.
16. New 'setup' option that if insurance plan type is checked as paper then the claim will not be put into billing file for transmission. Eliminates non electric plans being transmitted.
17. Reconcile display closed claims tab works now.
18. Reconcile module has new listing of secondary to be printed.

SECURE WEB FTP is a fully automatic SECURE method for uploading claims via the web. The advantage of this new feature is you don't have to pick the folder/files they just upload correctly to our Secure server. Using this function is many times faster than telephone/modem transmissions.

Click START, click RUN, type

C:\RxDME2\SAFETP20.EXE

Once installed Click START, Programs, SafeTP Manager and turn on "SafeTP Protection Enabled and select "FULL ENCRYPTION" under policy options pull down.

To learn more about our "SafeTP" go to <http://safetp.cs.berkeley.edu/>

Windows XP offers free remote control called remote assistance if interested just install MSN Messenger!
